**U.V.PATEL COLLEGE OF ENGINEERING**

## **USES OF MATRIMONIAL SITE?**

- The matrimonial site is helping people to find his/her dream future partner
- This will help to connect not only two people but it will connect two families

## **REGISTRATION**

- First the user has to make an account in this site by filling the given information.
- Registration asked 3 types of information:-
  - (i)Basic information
  - (ii)Occupation information
  - (iii)Hobbies

The information which the person has filled during registration that information will view by other person , so that he/she can know that person and contact that person

## **Searching Partner**

- We can search our partner on the basis of 4 choices:-
  - (i)Age
  - (ii)City
  - (iii)Caste
  - (iv)Country

After searching he/she can view the information of that partner so that he/she contact that person.

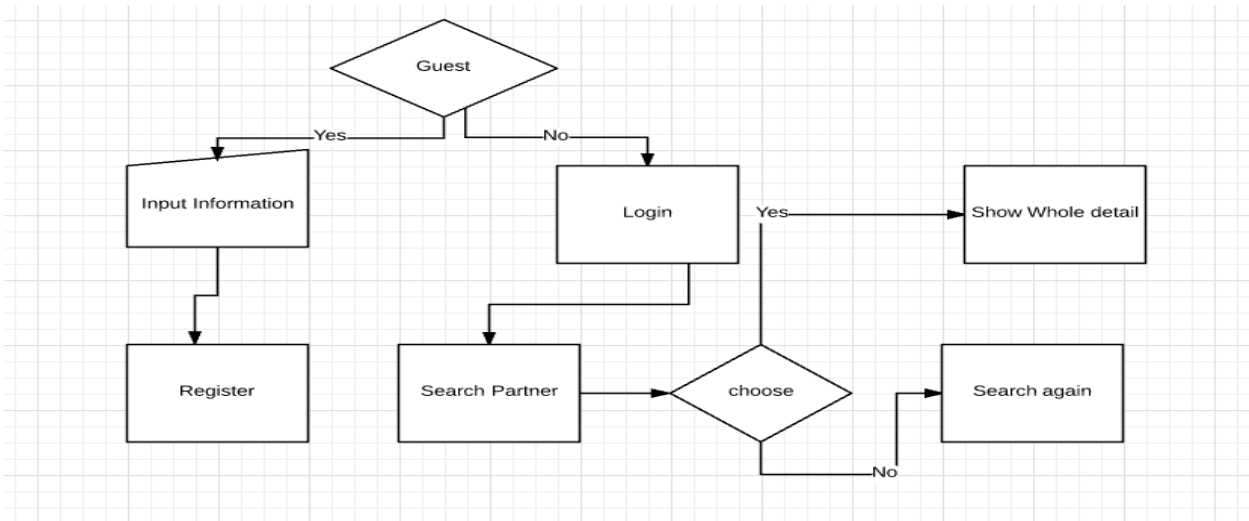

## Languages & Tools

- mySql
- Apache Tomcat
- HTML
- CSS
- Javascript
- JSP Sevelet

## Future Scope

- The future scope of this project is that we can make a video call through that site
- We can message that person whom we have to met through that site
- A person can see the update of our site like which person has currently join our site so that oter person can see that person information

## Flow Chart
