Title: Management System for State Transport Corporation

Languages to be used: C

Description: Management System for State Transport Corporation will help both Public Transport corporation officials to know about the current Scenario of transport operation enabling public to view the facilities available. To start this project, users have to just run the project and its user friendly menu items will help both its public and government officials to handle this database management system easily. In this system developer needs to focus on the different parameters such as Transport database, daily collection, Authentication system, feedback, Reports (daily, weekly, monthly, Route wise...) and details about the available facilities.

Assumption: Rules and regulations can be properly fixed and documented in the project report.

Expected outcome: The system has to work for all conditions in State Transport Corporation environment without errors, all expected reports to be seen, User Interface to be good.
